Professional Summary

Aspiring Full Stack Developer with experience in web application development, UI design, API integration, debugging, and AI/ML-based application development. Skilled in React, Bootstrap, JavaScript, Python, database management, and machine learning concepts. Quick learner with strong teamwork and problem-solving abilities.

Technical Skills

Frontend: React.js, HTML5, CSS3, Bootstrap, JavaScript (ES6+)

Backend: Node.js, Express.js, Flask, REST APIs

Languages: Python, Java, JavaScript, C

Databases: MySQL, SQL, MongoDB

AI / ML: Machine Learning, NLP, Generative AI, Scikit-learn

Libraries: NumPy, Pandas, Matplotlib, Seaborn

Tools: Git, GitHub, VS Code, Google Colab, Hugging Face, Arduino IDE

Cloud: AWS (ML & Cloud Foundations certified)

Work Experience

Full Stack Developer Intern | [Daynt](#)

2026

- Built and deployed responsive UI components using React.js and Bootstrap, improving cross-device consistency across the application.
- Integrated RESTful APIs with backend services, enabling seamless data flow between frontend and database layers.
- Collaborated with senior developers in debugging and testing web applications, reducing reported UI defects by identifying root causes in the component lifecycle.
- Contributed to database integration tasks using MySQL, including schema design and query optimization for key feature modules.

Projects

Multilingual Text & Document Translation System | [Flask](#) · [Python](#) · [Googletrans API](#) · [HTML/CSS](#) · [JavaScript](#)

- Developed a full stack web application supporting real-time translation for text and documents in PDF, DOCX, PPT, and TXT formats across multiple languages.
- Designed a responsive frontend with file upload and language selection UI; connected to a Flask backend that processes translation requests via the Googletrans API.
- Handled multi-format file parsing and download with edge case management for encoding mismatches and large documents.

Intelligent Assistive System for Amputees Using IoT and Machine Learning | [Python](#) · [Scikit-learn](#) · [Arduino](#) ·

- Led a team to build a smart wearable that uses IoT sensors and a predictive ML model to detect anomalies in leg posture and send real-time alerts.
- Research published in an IEEE and Scopus-indexed journal — recognized as an innovative application of ML in assistive healthcare technology.

Quantum-Inspired Brain Tumor Classification | [Deep Learning](#) · [Python](#) · [MRI Data](#)

- Designed a hybrid ML and deep learning model using orthogonal polynomial transformation for accurate brain tumor classification from MRI scans.
- Achieved strong classification accuracy through feature engineering experimentation before applying the neural classifier.
- Developed a full-stack web application using React for the frontend and Flask for the backend to enable MRI image upload, prediction processing, and result visualization.

Crop Yield Prediction System | [Machine Learning](#) · [Python](#) · [React](#) · [Flask](#) · [Data Analytics](#)

- Developed a machine learning-based crop yield prediction system using environmental, soil, and agricultural datasets to estimate crop production accurately.

- Integrated live weather data analysis and satellite image mapping features to enhance prediction accuracy and provide real-time agricultural insights.
- Implemented data preprocessing, feature engineering, and predictive modeling techniques for improved performance and reliability.
- Built a full-stack web application using React for the frontend and Flask for the backend to deliver interactive crop yield predictions and visualization dashboards.

Education

B.Tech. in Computer Science & Engineering (AI & ML) <i>Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology, Chennai</i>	<i>Aug 2022 – May 2026</i> GPA: 9.1 / 10
Intermediate (MPC) <i>Vignan Co-op Junior College, Guntur</i>	<i>June 2020 – July 2022</i> 91%
10th (CBSE) <i>Vignan High School, Guntur</i>	<i>June 2019 – Mar 2020</i> 74%

Certifications

- ▷ Machine Learning — *AWS Academy*
- ▷ Cloud Foundations — *AWS Academy*
- ▷ Natural Language Processing — *Springboard*
- ▷ Generative AI — *Gen AI Academy*
- ▷ Python Programming — *Udemy*
- ▷ TCS iON Career Edge — Young Professional — *TCS iON*
- ▷ C Programming — *Dream India Technologies*

Achievements & Activities

- ▷ **IEEE & Scopus Publication** — Led team research on intelligent assistive systems for amputees; paper accepted in IEEE and Scopus-indexed journals.
- ▷ **Cambridge English Proficiency** — Awarded Merit, demonstrating strong professional communication skills.
- ▷ **Student Placement Coordinator** — Organized campus recruitment drives and facilitated student-recruiter communication at Vel Tech.
- ▷ **Volleyball Tournament** — 1st place in regional tournament; featured in local press for outstanding performance.
